Circular No. 23/06/010

Sub: Leveraging of Technology for improving vigilance administration in the National
E-Governance Plan.

The Commission observes that e-procurement software, security and implementation is a new area and needs improvement. E-procurement provides a platform for the collaborative procurement of goods, works and services using electronic methods at every stage of the procurement process. The e-procurement platform transacts confidential procurement data and is exposed to several security threats. Department of Information Technology could be best placed to address issues relating to e-procurement. In order to ensure proper security of the e-procurement system all Departments/Organizations are advised to get their system certified by Department of Information Technology.
